*The Great Post Office Scandal* Nick Wallis,2021-11-18 The Great Post Office Scandal is the extraordinary story behind the recent ITV drama series Mr Bates vs The Post Office. This gripping page-turner recounts how thousands of subpostmasters were accused of theft and false accounting on the back of evidence from Horizon, the flawed computer system designed by Fujitsu, and how a group of them, led by Alan Bates, took their fight to the High Court. Their eventual victory in court vindicated their claims about the defects of the software and exposed the heavy handed attempts by the Post Office to suppress them. The book also chronicles how successive senior managers, business leaders, lawyers, civil servants and Government ministers, at best failed to expose the injustice or, even worse, sought to cover it up, resulting in one of the largest miscarriages of justice in UK history. The author, Nick Wallis, is a journalist and broadcaster who has been reporting on the scandal for over ten years and who acted as script consultant on Mr Bates vs The Post Office, the ITV drama that brought the affair into the national consciousness. As the public inquiry reaches its climax, and senior figures such as Paula Vennells come to be questioned, The Great Post Office Scandal reveals the full scale of what happened and will leave you enraged at how so many of our trusted institutions allowed the saga to go on for nearly a quarter of a century, shattering the lives of thousands of innocent people.

*Consequences of Microbial Interactions with Hydrocarbons, Oils, and Lipids: Biodegradation and Bioremediation* Robert J. Steffan, 2019-08-22 In this book international experts discuss the state-of-the-art in the biological degradation of hydrocarbons to meet remedial or disposal goals. The work focuses on practical applications, often on globally important scales including the remediation of some of the world's largest crude oil spills. Other related chapters discuss important implications of microbial transformation of hydrocarbons, including treatment of high fat processing wastes, impacts of microbial biodegradation activity on industrial processes, and the implications of microbial oil degradation in relation to modern oil extraction processes like hydraulic fracturing of shales and extraction of oil sands.

**Eleanor** Harry M. Callahan, Julian Cox, 2007 Harry Callahan (1912-1999) was one of American photography's great innovators. During a career that spanned six decades, Callahan pursued an individual and experimental approach and investigated a wide range of themes, techniques, and materials. Yet he cherished no photographs more than the images of his wife, Eleanor, which form an intimate visual diary of a lifestyle and a relationship. This is the definitive publication of Callahan's photographs of Eleanor. For almost two decades from the early 1940s to the early 1960s, Callahan photographed his wife in countless ways; nude and clothed, indoors and outdoors, in public parks and city streets, at the beach, in a tent, in the woods, among sand dunes, and in the privacy of the family home. Reproducing many previously unpublished images, Harry Callahan: Eleanor offers an in-depth presentation of a single subject over many years, providing a new understanding of Eleanor as a subject and Callahan's lifelong exploration of the creative potential of photography.

**Tales from Gombe** Anup Shah, Fiona Rogers, 2014 The chimpanzees of Tanzania's Gombe National Park are probably the most famous group of wild animals in history, having been observed and chronicled for more than 50 years. Through studies initiated by the palaeontologist and anthropologist Louis Leakey and carried out by the primatologist Dr Jane Goodall, people

worldwide know their names and stories. Anup Shah and Fiona Rogers have spent much of the last decade in their company, getting to know their characters and learning about the intricacies of their lives. *Tales from Gombe* provides an unparalleled insight into their world. Through endearing stories and stunningly intimate photography, the book tells the story of their lives, an epic saga full of convoluted plots, family alliances, intrigue, love, passion, suffering, ambition, politics, puzzles, surprises and controversies. Anup Shah and Fiona Rogers introduce us to all the different characters in this unique family, from the bold and mischievous Google and the powerful Titan to the enigmatic Freud. The combination of breathtaking photography and rich social history will inspire all those who read it to learn more about our closest cousins.

**Julia Margaret Cameron** Julian Cox, Colin Ford, 2003-03-20 According to one of Julia Margaret Cameron's great-nieces, "we never knew what Aunt Julia was going to do next, nor did anyone else." This is an accurate summation of the life of the British photographer (1815-1879), who took up the camera at age forty-eight and made more than twelve hundred images during a fourteen-year career. Living at the height of the Victorian era, Cameron was anything but conventional, experimenting with the relatively new medium of photography, promoting her own art through exhibition and sale, and pursuing the eminent personalities of her age—Alfred Tennyson, Charles Darwin, Thomas Carlyle, and others—as subjects for her lens. For the first time, all known images by Cameron, one of the most important nineteenth-century artists in any medium, are gathered together in a catalogue raisonné. In addition to a complete catalogue of Cameron's photographs, there is information on her life and times, initial experiments, artistic aspirations, techniques, small-format images, albums, commercial strategies, sitters, and sources of inspiration. Also provided are a selected bibliography of publications on Cameron, a list of exhibitions of her work held both in her time as well as our own, and a summary of important collections where her pictures can be found.

**Diseases of Coral** Cheryl M. Woodley, Craig A. Downs, Andrew W. Bruckner, James W. Porter, Sylvia B. Galloway, 2016-01-26 Coral disease is quickly becoming a crisis to the health and management of the world's coral reefs. There is a great interest from many in preserving coral reefs. Unfortunately, the field of epizootiology is disorganized and lacks a standard vocabulary, methods, and diagnostic techniques, and tropical marine scientists are poorly trained in wildlife pathology, veterinary medicine, and epidemiology. Diseases of Coral will help to rectify this situation.
