Hero's Loop Mike,Denniese Liles,2014-05-12 Hero's Loop is a book about the fun and adventure of boating. It begins with circumstances that lead a young boy to love and own boats. His love for boats influences him as an adult to work on old boats as a hobby and enjoy the sight of seeing an old boat turn into a jewel. This book exults the friendships developed and maintained within the boating community. The book is mixed with fun and adventure and a few mistakes along the way while completing the Loop around the eastern part of North America. The Loop encompasses over six thousand miles of waterways and Mike, Denniese and a wild beagle dog named Maggie Mae take you along the way as if you were part of the crew. Enjoying the view and appreciating the uniqueness of each location adds flavor to Hero's Loop. Put on your PFD and enjoy the ride.

Surrogates Robert B. Gramacy,2020-03-10 Computer simulation experiments are essential to modern scientific discovery, whether that be in physics, chemistry, biology, epidemiology, ecology, engineering, etc. Surrogates are meta-models of computer simulations, used to solve mathematical models that are too intricate to be worked by hand. Gaussian process (GP) regression is a supremely flexible tool for the analysis of computer simulation experiments. This book presents an applied

introduction to GP regression for modelling and optimization of computer simulation experiments. Features: • Emphasis on methods, applications, and reproducibility. • R code is integrated throughout for application of the methods. • Includes more than 200 full colour figures. • Includes many exercises to supplement understanding, with separate solutions available from the author. • Supported by a website with full code available to reproduce all methods and examples. The book is primarily designed as a textbook for postgraduate students studying GP regression from mathematics, statistics, computer science, and engineering. Given the breadth of examples, it could also be used by researchers from these fields, as well as from economics, life science, social science, etc.
