Hero's Loop Mike, Denniese Liles, 2014-05-12 Hero's Loop is a book about the fun and adventure of boating. It begins with circumstances that lead a young boy to love and own boats. His love for boats influences him as an adult to work on old boats as a hobby and enjoy the sight of seeing an old boat turn into a jewel. This book exults the friendships developed and maintained within the boating community. The book is mixed with fun and adventure and a few mistakes along the way while completing the Loop around the eastern part of North America. The Loop encompasses over six thousand miles of waterways and Mike, Denniese and a wild beagle dog named Maggie Mae take you along the way as if you were part of the crew. Enjoying the view and appreciating the uniqueness of each location adds flavor to Hero's Loop. Put on your PFD and enjoy the ride.

Physics of Tsunamis Boris Levin, Mikhail Nosov, 2008-10-27 Till the very end of the twentieth century tsunami waves (or 'waves in a harbour', translated from Japanese) were considered an extremely rare and exotic natural phenomenon, originating in the ocean and unexpectedly falling upon the seaside as gigantic waves. The 26th of December 2004, when tsunami waves wiped out, in a single day, more than 250,000 human lives, mourned in many countries, turned out to be a tragic date for all mankind. The authors of this book, who have studied tsunami waves for many years, intended it to be a systematic exposition of modern ideas concerning

- The mechanisms of tsunami wave generation
- The peculiarities of tsunami wave propagation in the open ocean and of how waves run-up beaches
- Methods for tsunami wave registration and the operation of a tsunami warning system
- The mechanisms of other catastrophic processes in the ocean related to the seismic activity of our planet

The authors considered their main goal to be the creation of book presenting modern knowledge of tsunami waves and of other catastrophes in the ocean to scientific researchers and specialists in geophysics, oceanography, seismology, hydroacoustics, geology, geomorphology, civil and seaside engineering, postgraduate students and students of relevant professions.
